FULL STACK WEB DEVELOPER

COMPANY INTRODUCTION:

We **Code Align** are an adaptive enterprise, focusing on developing a culture of advancement and empowerment to establish an environment where individuals are driven and centered around accomplishing greatness. The primary approach of our organization is based on the simple analogy that is the success of our clients equates our success as well. We provide web base services including ecommerce solutions, business to business applications, business to client applications, managed hosting, etc. are just few of the services we provide.

Job Description

We are looking for a Full Stack Web Developer to join our cutting-edge development team as it grows. We want someone who has the ability to show case himself and knows how to handle himself and emerge as a leader in difficult situations or when he is provided with a difficult task. The ideal candidate must be a divergent thinker who understands industry best practices and has experience with multiple coding languages. They are a team player possessing strong analytical as well as technical skills, and are able to communicate the logic behind technical decisions to non-tech stakeholders. They must be comfortable working in an agile environment and have the ability to “take the wheel” when necessary.

Responsibilities:

- Analyze and understand user requirements
- Create innovative, scalable web base software solutions
- Work closely with project managers, UX designers, other developers, systems analysts, graphic artists, and sales and marketing professionals
- Write and test code to ensure compatibility and stability: refine and rewrite as necessary
- Create clear technical specifications
- Integrate data from various back-end web services and databases
- Ensure cross-browser compatibility of new features
- Collaborate with web designers to realize visual design intent.

Skills and Qualifications

- A bachelor's degree in Computer Science/ software engineering or Information Technology
- 2+ years' experience in developing web base software solutions
- A thorough understanding of computer architecture, operating systems, data structures, OOP, database
- Having an extensive and experience of JAVA, PYTHON, C#, C++ would be a plus
- Must have in-depth knowledge and understanding of HTML5, CSS, jQuery, Ajax, BOOTSTRAP, JavaScript, MongoDB, MYSQL
- Experience working with different JavaScript frameworks like node.js, express, etc.
- The ability to analyze complex technical information
- Comfortability designing and implementing database structures to solve real-world problems effectively
- Familiarity with UI toolkits and frameworks
- Organized approach to work
- A logical, analytical, and creative approach to problem-solving
